

HEAVY RAINS AGAIN CAUSE ELBA CITIZENS TO WORRY ABOUT FLOOD

Torrential rains that have bucketed over 7-1/2 inches of rain on south Alabama since early Tuesday morning have Elba residents keeping a wary eye on the Pea River as it rises toward an expected crest of 32 feet, two feet above flood stage.

The rains, caused by a low pressure system which moved inland from the Gulf, have swollen the river from a reading of 9 feet at 7 a.m. on Tuesday to a depth of 26.05 feet at 4 p.m. Wednesday.

The rain started at approximately 10 o'clock Tuesday morning, and by 6 a.m. Wednesday, the National Weather Service reported that 5.48 inches had fallen in Elba. An additional 2 inches fell Wednesday during the day, making the total rainfall over a 30-hour period 7.45 inches.

The National Weather Service in Montgomery estimates a crest of 32 feet will occur sometime this morning (Thursday), but weather experts told THE CLIPPER "No drastic

flooding is expected."

Many Elba residents are thinking back to the flood of Wednesday, February 19, 1975, when the river crested at 37.5 feet. That flood caused nearly \$400,000 in damage and local residents fear a repeat of that disaster.

Coffee County Civil Defense Director Moose Hope accompanied members of the 46th Engineers from Ft. Rucker on a tour of the Elba area late Wednesday afternoon, and decided additional pumps were

needed to stop, advised against bringing in extra pumps. According to Hope, the river would be going down on its own by the time the pumps could do any good.

Representatives of the Army Corp of Engineers also arrived late Wednesday with sand bags in case they were needed.

Mayor, councilman help get pump started

TELLS COMMISSIONERS

Fire Marshall Reports County Jail Not Safe

The Coffee County Commission met on Monday, January 23, at the Courthouse in Elba, and was informed that the State Fire Marshall stated after a recent inspection that the County Jail was "a threat to the lives of all housed in it."

The jail was inspected on December 13, and the results of the inspection were presented to the commission Monday afternoon by Sheriff Neil Grantham.

"We're one of the few counties that hasn't been sued after the recent jail inspections," said Sheriff Grantham, "but I'm afraid we'll be next if something isn't done."

The report stated that no progress has been made on correcting the unsafe conditions in the jail since the county was initially notified. Five inspections have been conducted since the initial report, but no work has been done.

Grantham told the Commission that fire-proof mattresses have been purchased and work is being done on fire security doors.

"The Fire Marshall requested we build a fire escape for the upstairs," stated Grantham, "but I think that would provide the prisoners another possible means for breaking out."

The commissioners discussed the problems and directed Commissioner Rex Boutwell and Commissioner Jack Hornsby to work with the sheriff in correcting the unsafe conditions at the jail.

Sheriff Grantham met with the commission during the afternoon session, but the bi-monthly meeting actually convened at 10:00 a.m. Present were Probate Judge James L. Sawyer and Commissioners Jack Hornsby, Rex Boutwell, Glimmer Grant, Bennie Beckham, Don Smith and Maxwell Reeves.

Commission members examine a garbage truck during Monday's meeting. The commissioners failed to purchase a large truck, but promised to award a contract next Tuesday.

studied the bids for over two hours and then presented an itemized breakdown of the various bids to the members of the commission. The only bids that were accepted were on a one-ton truck, by Cook Chevrolet of \$5600.40, and a small garbage pumper body by Enterprise Hydraulic & Truck Company, for \$5490.

Other bids not accepted were on a small pickup truck, a two-ton truck and a large garbage pumper body. The commission discussed the bids received on these items, and agreed to award contracts for the additional equipment on Tuesday, January 31, at a special meeting.

Engineer Leslie Mullins reported he had interviewed Mr. Tim Hornsby for the post of Assistant County Engineer, and recommended the Commission meet with the applicant. Mullins recommended the young man be hired as soon as possible.

The various county officials will be on the road quite a bit during the upcoming weeks, as the commission authorized its members to attend several meetings. The Commission authorized:

***all Commission members and the solid waste supervisor to attend a meeting of county government officials at Lake Guntersville on February 22, 23 and 24;

***all Commission members to attend a meeting in Montgomery on Feb. 1 for Open House for county officials at the Capitol;

***two County Highway Department employees to attend a two-week school on bridge maintenance and inspection in Montgomery - (the employees will commute daily); and

***authorized Engineer Mullins to attend a conference on construction to be held at Montgomery on Feb. 21 and 22.

In other action, the Commission: ***heard a request for county building standards and minimal housing standards from a law firm;

***failed to recommend a new member to the Farm Center Board;

***heard a request for financial aid from the Council on Alcoholism;

***was informed the landfill passed a recent inspection, but suggestions were made for upgrading the system;

***heard Sheriff Grantham report that the jail needed a food freezer, an outdoor storage shelter and a sofa;

***delayed action on a pay raise for employees of the Probate Office; and

Natural Gas Prices To Increase Here March 1st

Higher natural gas rates are on the way for all 30,000 customers of the Southeast Alabama Gas District. All bills received by customers after March 1, 1978, will reflect the rate increase. It has been forced on the Gas District, according to R. J. Smith, manager, by a series of increases in the cost of gas purchased by the District.

"Our supplier has hit us with six increases, all approved by the Federal Power Commission, since October, 1976," Smith said. "We can no longer absorb our increased gas cost without a rate increase."

"Under our new schedule," Smith added, "our income will permit us to meet our obligations and render satisfactory service."

The new rates have been calculated on a sliding scale. Smith pointed out that customers in the smallest consumption categories will actually enjoy a minor decrease in rates. "We have very few customers in these categories," he said. "Rates for nearly all our customers will go up."

A table giving old and new General Service rates appears in this newspaper.

as an advertisement elsewhere in this newspaper. Sample increase: A customer who uses 15,000 cubic feet per month has been paying \$41.57. On his bill received after March 1, he will pay \$45.64.

The Gas District's last increase, five cents per hundred cubic feet "across the board," was announced in October, 1976.

William Lister Brunson, founder and president of National Security Insurance of Elba died of an apparent heart attack at his home early Wednesday morning. He was 57 years old on January 16 of this year. Brunson was rushed to the local hospital by the Rescue Squad, but was dead on arrival.

Friends of the family report that he had been outside earlier

worrying with rainwater collecting in a drainage ditch behind his home.

Brunson was born in Samson, Alabama, in 1921. He graduated from Elba High School in 1938, University of Alabama with a BS in 1943. He founded National Security Insurance Company in February of 1947 with his father, the late W. M. Brunson. The office operations were in Brunson's home. National Security continued to grow under Lister Brunson's leadership, and during 1977 opened new million-dollar home office complex in Elba.

Brunson, who worked as a practicing attorney in Elba before entering the insurance business, was serving on the boards of Elba Exchange Bank, First Federal Savings and Loan Association of Enterprise, Nasco Equipment Company of Elba, and Elba General Hospital, in addition to his duties at National Security.

Brunson is survived by his wife, the former Carolyn English of Elba; three children, Alice Maddox of Enterprise; Bill, who is attending the University of Alabama, and Betsy of Elba; two brothers - Jack R. Brunson of Elba, and Jerry Brunson of Enterprise; two sisters - Mrs. J. E. Pittman of Enterprise and Mrs. Patsy Folmar of Goshen.

Funeral services had not been announced at press time.

The schools could greatly benefit from parents and other community members who have special knowledge, hobbies, talents, skills, travel experiences, etc.

Arrest Made In Store Owner Death

Charles and Debra Bracewell, both currently serving time in the Covington County Jail, have been charged with first-degree murder in the shooting death of store owner Rex Carnley last August.

The couple, which calls Elba, Samson and DeFuniak Springs home, were charged last week with the murder of Carnley, who was found dead in a pool of blood on the floor of his country store just east of Opp on Highway 84. The charges came following a five-month investigation into the death and robbery of Carnley.

The young couple was arrested four months ago in Florida on charges of burglary and grand larceny, and they were brought back to Covington County to stand trial. Mrs. Bracewell was released on bond after being returned to local authorities, but was later charged with burglary and was returned to jail.

Charles Bracewell, 27, is an ex-convict having served 10 years in prison for kidnapping and robbery. Mrs. Bracewell, 17, has been charged with several counts of burglary in the Opp area.

The Bracewells were reported to have been prime suspects since the beginning of the investigation and law officers have concluded that there were no other accomplices.

A passing motorist found Carnley's body on the morning of August 15 on the floor of his small store. He had been shot nine times with a .22 caliber revolver which was found lying beside the body. Later examination revealed that 5 bullets had entered his face, 1 entered his hand and three had been fired into the back of his head.

The evidence will be presented to the Grand Jury on February 13, with the charge of first degree murder.

W. L. Brunson

Driver Safe After Wreck Last Week

Mrs. Mattie B. Green was involved in a one-car accident on Thursday, January 19, while traveling north on Highway 87, approximately 12 miles from Elba.

Mrs. Green was freed from the wreckage by passing motorists and was taken to a relative's home where she was reportedly shaken up but uninjured.

POOR ORIGINAL

BRAINSTORMS

With Ferrin Cox

I apparently misused last week with the prediction that former Chief Justice Harold Griffin would not seek the Senate seat being vacated by John Sparkman. This week I personally saw one of the telegrams he has mailed out all over the state to friends. The message in them is that he will be announcing "in a few days." Griffin is also asking for names of people interested in good government. That puts at least four in the race - Griffin, Governor Wallace, State Senators Donald Stewart and John Baker.

Mayor Robert Folsom came into the office Saturday mad as a hornet wanting us to go take a picture of county prisoners washing a policeman's private car behind the city hall. He didn't know what I reminded him that I had a camera, was he alone, etc. However, after the woman completed her business, I did lock the door and go check the matter. Well, Folsom had told the young jail residents that they weren't supposed to wash private cars there, and according to them, they quit (having all three times to stop each action). Folsom said he had tried three times to stop each action, but I can find no other case of it happening. It was stopped, the inmates now know better, the police officer (Simon Benson) said they always washed his car, but never before at a police station (and never again). Also, the police chief said it was the first time he had ever known of it happening, and he would be the last! Sorry we couldn't get a photo but, but you had already run them off.

President Carter has suggested a budget of half a trillion dollars. Folks like me can't even understand how much money that represents - we still worry about gasoline going up a penny. The shocking thing is that Carter, a farmer, has actually cut the agriculture budget in spite of the interest of the farmers in a strike unless they get a better share.

The county commissioners indicate they are going to make a recommendation to the people on the courthouse issue. They have a bunch of studies and are currently reading them and promise to let their stand with facts and figures to back them up. I peeped at one of the studies and realized it would take a lot of studying to sort out something concrete for us average folks.

A lady called again about the dogs turning over garbage cans in Elba. She suggested sprinkling crushed chili peppers or tobacco on and around the cans if you are having a lot of trouble - she was speaking from experience. The city fathers are considering allowing us to put our garbage cans in the back yard when they add the extra money the county is going to start charging to use the county landfill. Folks I have asked about this are in favor of the idea. Garbage workers say the extra walking on their part will be offset by not having to clean up where the dogs scatter the garbage in the front yard.

Former Governor Albert Brewer was in Elba Wednesday. Everyone is expecting him to be a candidate for Governor this year. In fact, a survey I read about in a Montgomery weekly newspaper indicated he was the leading candidate at that time.

Tuesday night the local Pilot's Club was short a speaker and ye old editor filled in for them. After a good meal, I did a bit of talking, which I enjoyed far more than they could ever enjoy hearing me. Then when it was all over, and they presented me with a small gift, I held my breath that it wouldn't be a cigarette lighter with my name engraved. Sure enough, it was something else, and I needed a money clip. I was beyond me - maybe they are helping me dream of better days! If I can keep "the present" away from our little one who helped me open it, I promise to carry it faithfully.

New Brockton Students Have Special Visitors

Encouraging the students to appreciate various forms of the arts, New Brockton Schools had two meaningful performances recently.

On January 11, Miss Nancy Taylor, Artist in Residence of the Coffee County Schools, arranged for the junior high students to hear Kathryn Tucker Windham, who is well known as an especially enriching production because many of the students had been prepared in their classes to experience the play based on the boyhood life of young Sammie Clemens, later to be known as Mark Twain.

On January 12, the Robin

LAW ENFORCEMENT IS EVERYBODY'S BUSINESS

If there is any doubt that law enforcement is everybody's business, and the assistance and cooperation of every citizen is needed to keep the peace, the statistics on crime trends, the next twelve months there will be two million homes and businesses burglarized, over a million cars stolen, about 350,000 people will be injured or otherwise assaulted, a similar number will be robbed, and about 20,000 will be brutally murdered. In addition, among the most despicable crimes, there will be 40,000 women who will report being raped, and another 100,000 will be the victims of rape, but will not report it.

Until recently, the crime rate has not been as high as it is now. However, among men, has long been somewhat of a joke, with most believing simply, "women can run faster with skirts than men can with pants down." It is true, the cry of rape has no doubt been used down through the years by questionable women who hope a court-backed possibility of monetary gain, establishing paternal responsibility, etc. But, this category is minute compared to the thousands who are serious rape victims. What has awakened the male scolders? Homosexual street attacks against men in some areas of the country now help in establishing the facts about this psychotic crime category.

Establishing the facts about this psychotic crime category. Rape is far more often a crime of opportunity than premeditation, due to the obvious physiologic involvement. Adult women are copious of this fact, yet allow situations of potential attack to develop, seemingly with little thought of avoidance. Why?

All people, men and women alike, dress to be their most attractive. The basics of human nature demand notice, admiration, in varying degrees from those around us. But rape victim case analyses often indicate many women go overboard in the attainment of these commonly desired goals. Example: the night worker who dresses in peacock blue, see-through skirt, with accompanying signals of unavailability, when she knows she will wait 20 minutes for her midnight bus ride home in a questionable neighborhood.

Don't many sexual attackers come through open windows late at night? Some do, but how would they gain entrance if common sense precautions were taken by the woman alone? One woman was attacked in her third floor bedroom by a rapist who climbed up to her window, opened the window, using a ladder from her own garage that had been left unlocked. The only way she could have made it easier would have been to leave a key in the front door lock.

The "new morality" and deepening convictions about women's liberation have with increased frequency of forcible rape. Law enforcement is in agreement with women having equal rights, but we dislike seeing women place themselves in situations of high vulnerability to criminal attack, when setting out to prove they are equal. Some common sense rules for preventing sexual attack are worthy of every woman's consideration.

"Dress for the occasion or social situation you anticipate. Avoid being on the streets, alone, late at night, especially in unfamiliar surroundings. Don't open your door to strangers -- day or night -- unless you have proved by credentials the caller is who he claims to be, and admit that is essential to complete a legitimate purpose. Keep outside door locked while determining. Don't be 'too nice' to strangers, at your door or at social gatherings when knowing you will leave alone. Avoid flirtations, unless ready for any eventuality. If you live alone, list only your initials in phone directories and on mail boxes. If you drive alone, even in daylight hours, keep the doors locked. When traveling the highways, don't park along roadway to rest unless in an officially provided roadside rest area, with numerous users. Make certain all windows in your home have stable screens that can be locked, and screening material is in good repair. Do not leave outside entries entrusted to the limited protection of hood-

Miss Lewis

Workshop For Baptist Girls Leaders Planned

Areas in which Miss Lewis will offer help are Missions Adventures and Day Camp. Missions Adventures is a program for each girl to work as an individual. It gives an opportunity to grow in mission study, praying and giving growth, and in putting missions into action in the community. A day camp will include those for the coming summer's special study on Korea, and will be held by the local churches.

Survivors include two daughters: Mrs. Edna Lee Parker, Opp, and Mrs. Gertrude Parker, Elba; eleven grandchildren, 20 great grandchildren, and one great-great grandchild.

Persons admitted to Elba General Hospital during the week of January 17 through 24 are as follows: John C. Askew, Eva Daniels, Sam E. Kelley, Agnes Mack, Nora Flowers, June Dalke, Johnnie E. Jones, Allen Johnson, William Powell, Estelle Foley, David White, L. F. Capps, Alasia Jacobs, Lizzie Pope, Wanda Whitehead, Louise Stuckey, Stephen Bragg, Rebecca Davis, Bridget Greenwood, Roy M. Lindsey, Clarence Elder, Jessie M. Reynolds, Ethel Mahone, Wilson Cole, Amos Hussey, Ora Lee Padgett, Hubert Morrey, Garvie Abernethy, Robert Duncan, Jerry Dawkins, Lewico Kennedy, Lisa Crook, Patricia Barnes, C. C. Gibson, Estelle Lunsford, Sally McDowell, Harry Goodson, Fred, Stanley Prior, Grover Kelley, Lomie Ford.

Those discharged during the same time are: John C. Askew, Eva Daniels, Sam Kelley, June Dalke, Johnnie B. Foreman, William Powell, Wanda Whitehead, Stephen Bragg, Rebecca Davis, Edna Mahone, Wanda Cole, Garvie Abernethy, Robert Duncan, Merle Spivey, Totie Parrish, Luna Delia Ringo, Garrett Cullis, Olean Kelley, Frances Davis, Yesta Balle, Mary A. Cook, Margaret Crocker, Luther Muwaring, Horace Norris, James Hooks, Roland Pope, Vonelle Nicholson, Mittle Cooper, Hillard Allen, Rebecca Thomas, Irvin Armstrong, Maggie Hattaway, Winnie Richards, Luther Worrell, Olean Parrish, Charlie Barbee, Nell Cooper, Linda D. Creech, Richard Ellison.

WE GOOFED! We made a mistake on the shower article for Mrs. Billy Grantham. Grantham's mother-to-be should have been Mrs. Howard Kelley and Mrs. Buck Grantham.

WHO'S WHO SELECTED AT ZION CHAPEL

Several weeks ago nominations were held to select candidates from each grade for the REBEL 78 Who's Who. The election was held on Wednesday, January 18, to select the winners. The election was conducted by the REBEL 78 staff under the supervision of Cindy Black, Features Editor, and Mrs. Rachel Bryan, Sponsor.

The REBEL 78 staff believes that it is a real honor to be selected to Who's Who because those who win are the ones who have earned the friendship and admiration of their classmates. However, it must not be forgotten that it is also a great honor to be nominated. Below are the names of those people who were selected from each homeroom for the nominations.

CUTEST - Vickie Ellison, Donna Senor, Patty Flowers, Boyd Deal, Byron Foley and Danny Hudson.

BEST DRESSED - Sandra Mobley, Suzanne Sanders, Jan

Sanders, Boyd Deal, Byron Foley and Rocky Bragg

MOST UNPREDICTABLE - Sherry White, Donna Senor, Timmy Lambert, Melinda Stinson, Kenny Campbell and Floyd Wheeler.

BIGGEST FLIRTS - Cheryl Bogar, Raynell Thompson, Lia Lowery, Hayes White and Byron Foley.

MOST DEPENDABLE - Jan Sanders, Mary Jo Davis, Kim Leverett, Ted Brunson, Tony Calhoun, Dewayne Bell and Hayes White.

WITTIEST - Sherry White, Melinda Stinson, Peggy Brown, Kenny Campbell, Mitchell Pearson, Ray Von Boyd and Danny Miller.

PRETTIEST LEGS ON CAMPUS - Pam Gattin, Lisa Annunzio, Cindy Black, Boyd Deal, Danny Miller and Ray Marler.

SWEETEST - Pam Gattin, Kathy Sawyer, Gail Richardson, Lisa Bell, Tony Calhoun, Greg Crook, Danny Hudson and Greg Egerton.

MOST INTELLECTUAL - Roxanne Senn, Sheila Kelley, Kim Leverett.

Debbie Pyfrom, Larry McWaters, Kim Leverett and Rocky Bragg

FRIENDLIEST - Melinda Whittington, Kathy Perkins, Pam Gattin, Lisa Bell, Danny Bundy, Sam Parker and Danny Miller.

MOST TALENTED - Evelyn Culver, Sheila Kelley, Lia Lowery, Dewayne Bell, Danny Miller and Jerry Downing.

MOST POPULAR - Vickie Ellison, Suzanne Sanders, Patty Flowers, Boyd Deal, Byron Foley and Ray Marler.

MOST LIKELY TO SUCCEED - Roxanne Senn, Sheila Kelley, Debbie Pyfrom, Boyd Deal, Kim Leverett and Rocky Bragg.

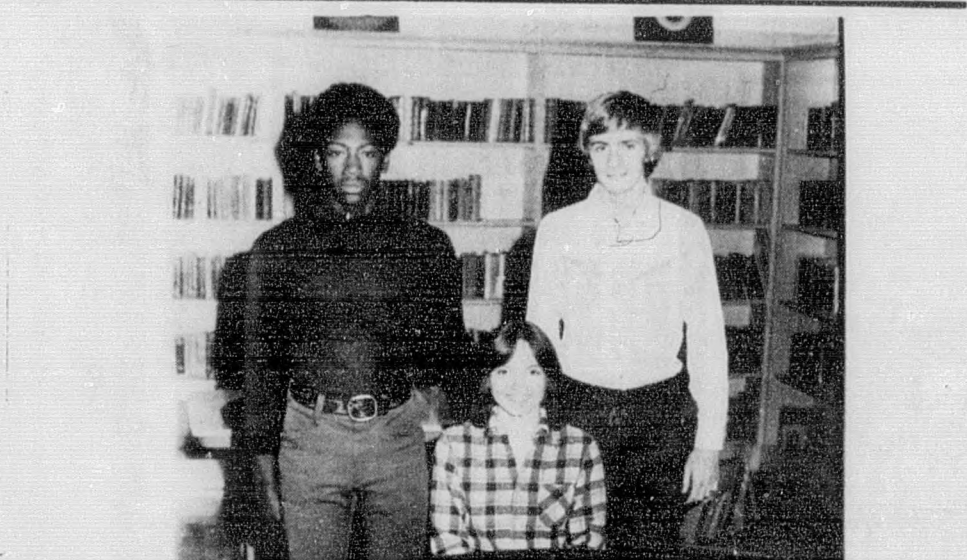

MOST ATHLETIC - Evelyn Culver, Margaret Pearson, Lynda Carnley, Boyd Deal, Byron Foley, Ray Von Boyd and Ray Marler.

BEST ALL-AROUND - Pam Gattin, Mary Ann Sheets, Suzanne Sanders, Patty Flowers, Boyd Deal, and Kim Leverett.

MOST UNPREDICTABLE - Sherry White, Melinda Stinson, Peggy Brown, Kenny Campbell, Mitchell Pearson, Ray Von Boyd and Danny Miller.

MARGARET PYFROM - Most Liked to Succeed and Most Intellectual

... You get four flat tires on your car.
... Your teeth are chattering on your first date.
... You fall flat on your face while ice skating.
... You meet the guy of your dreams and you don't know what to say.
... You miss the softball and three players make it home.
... You forget the words to the cheer you are leading.
... You have to kiss your girlfriend after eating onions and you just ran out of Certs.
... You studied all night for a test you didn't even have.
... The short, stout, fat, red-headed, freckled face, bow-legged, plump toed girl won't stop following you around.
... Your pencil breaks in the middle of final exams.

Natural Gas Rates To Be Increased

The Southeast Alabama Gas District's last increase in rates to its customers was effective October 20, 1976.

Since October, 1976, the Federal Power Commission has granted the Natural Gas Industry six rate increases. Most of these increases have been at the wellhead. In other words, they were granted to the Natural Gas producers, and the producers have passed the increases down the line to distributors such as the Gas District.

Your Gas District, therefore, must pass these increases on to its customers, effective with March 1, 1978, billings.

All rate schedules will be increased proportionately, although in the smallest consumption categories (as indicated in the table below) there are actually minor decreases. Our new rates will be reflected on all bills which customers receive after March 1, 1978.

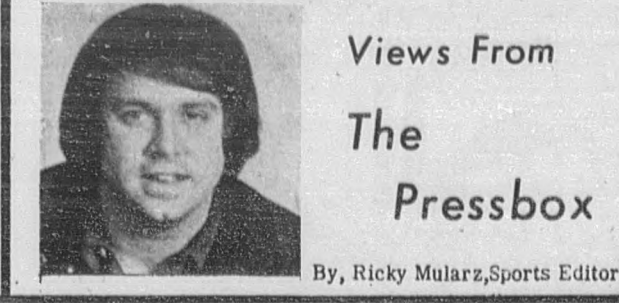

The table below illustrates the increase in General Service Rates. Column "A" gives the old rates, on consumption indicated by meter readings prior to February 20. Column "B" gives the new rates, effective on all meters read on or after February 20, 1978, and reflected on bills customers will receive after March 1, 1978.

Monthly Consumption (100 cu. ft.)	Column "A" (Old Rate)	Column "B" (New Rate)
Minimum Bill	3	\$ 2.00
10	4.38	4.24
30	10.67	10.64
80	24.17	25.64
100	29.57	31.64
150	41.57	45.64
200	53.57	59.64
300	75.57	86.64
400	99.57	113.64

Tigers Win One, Lose One In S.A.C. Cage Tournament

Views From
The
Pressbox
By, Ricky Mulaz, Sports Editor

The Elba Tigers played two good games last week in the S.A.C. Tournament and maybe the local capers are beginning to find that "win" spirit. For most of the season, the Elba players seemed content to lose, as long as they didn't get embarrassed. However, now that the players know they can win, maybe they'll buckle down and salvage a decent record.

I am an avid golfer, but many of my friends always tell me how crazy it is to spend "all that money" just chasing a little white ball around a cow pasture. They may be right, but it's just as expensive to pursue some other hobby! A U.S. Fish and Wildlife Service survey just revealed revealed fishermen spent \$15.5 billion on equipment in 1975, while hunters spent \$5.6 billion. That's an average of \$11.33 per angling day for fishermen and \$12.23 per day for hunters.

See, golfing's not so expensive after all!

Eufaula High School dominated last week's S.A.C. Tourney by winning both the boys and girls crowns. The boys beat a strong Troy team in the finals, 61-55, for their title, while the girls totally wiped out everybody enroute to their crown. The Eufaula girls beat Opp 96-37 in the opening round, and then after beating Troy, bombed the previously unbeaten Andalusia team 72-37 for the title.

Eufaula High has an excellent cage program and deserves congratulations on their S.A.C. championships.

A total of eight girls' teams competed in last week's tournament and among the schools not fielding a team was Elba. In my opinion there are many female athletes at Elba High and they should get a chance to compete against other schools. If Zion Chapel can afford to have a girls team, then Elba can, too! When the coaches start speaking of a "total" athletic program, they should include the girls. After all, they're students, too!

I was playing basketball Sunday afternoon at the gym and caught an elbow in the eye. The cash took a stitches to close, and for the next week or so, my left eye will be black and blue. A lot of people have been kidding me about coming out on the short end of a fight, but that's not how it happened!

Twin City Speedway in Kinston has changed hands again and is now owned in part by the manager of the Five Flags Speedway in Pensacola. I've always felt the track could make it financially with the proper management and maybe now the track can be something for Coffee County to be proud of.

I heard that Larry Green of Jack killed a 14-point buck last Saturday morning while hunting. We don't have a picture of the deer, but people who saw it report it was really something!

Leon "Doc" Holliday is pictured with a 10-point buck he killed on Monday, January 23, while hunting near Victor, Ia.

Also in the hunting party were Nick Maddox, Gary Parker, Dorel Simmons and Edlow Marler.

Jerry Parker and A. O. Farmer hold 90 crapple they caught last week.

Picture compliments of the Elba Bull Shop.

The Elba Tigers participated in the South Alabama Conference basketball tournament last week and pulled off a major upset before being ousted in the second round. The upset came when the Tigers blasted Laverne 58-39, in the opening round. Laverne was one of the 64 teams in the tourney with a 3 record, but were never in the game as Elba coasted to the victory.

The Elba Tigers saw their hopes for a second straight upset vanish under a barrage of free-throws last Thursday night as Andalusia defeated the Tigers 69-63.

Elba, playing with newly-found confidence, surprised the highly favored Bulldogs by leading to a 14-14 tie after one quarter. The Tigers ran at will through the Andy press in the second quarter and at the half owned a shocking 28-25 lead.

Elba came out fired up in the third quarter and began to pull away as they moved into a 39-28 lead midway through the period. Andalusia couldn't stop the Tigers' offense, and after three quarters of play, Elba owned a 46-38 lead.

The tide began to turn in the fourth quarter as Andalusia took advantage of free throws to get back in the game. Elba clung to the lead until the final minute of play when Andalusia nosed ahead by 2 points. The Tigers were forced to foul in the closing seconds in a futile attempt to regain the lead, but Andy hung on for the win, 69-63.

The Andalusia comeback came as the result of unbel-

SOCIETY

Three Seasons Study Club Meets With Gloria Moseley

The Three Seasons Study Club met Monday night, January 9, in the home of Gloria Moseley. A snack plate was served by the hostesses, Margaret Calhoun and Gloria Moseley. The devotional "My Favorite Prayer," was given by Janice Clark.

Sara Hutchinson of the Coffee County Extension Service presented the program, a tape entitled "What is Good Health?"

After the program, club president Betsy Cramton welcomed new member Kathy Cowen and called the business session to order. Club secretary Henrietta Grimes called the roll and read the minutes of the last meeting. Mary Jo Hudson gave a financial statement.

Jean Hudson gave each member instruction and the materials needed for the Mother's March of Dimes. The march is being held this week - January 23 - . Many Elba High School students will be assisting club members with the march.

The Projects Committee reported that the food, clothing, and gifts had been delivered during the holidays. The club's Christmas family, Jean Hudson reported that she, Mary Jo Hudson, and Janice Clark had taken the club's Christmas presents to the two monthly retarded persons at the Tarwater Center in Wetumpka.

The club voted to make a donation to the United Methodist Church with thanks for letting the club use the fellowship hall on many occasions. A donation was also made to the Coffee County Arts Alliance.

The president told the club members that the annual social would be held in February. All members were encouraged to attend and bring their dates.

The wedding will be an event of March 25, 1978, at the University of Southern Mississippi in the fall.

The wedding will be an event of March 25, 1978, at the University of Southern Mississippi in the fall.

Wilson-McKnight

Engagement Announced

Mr. and Mrs. John C. Wilson of Elba, announce the engagement of their daughter, Cynthia Nell, to James Patrick McKnight, son of Mr. and Mrs. Charles H. McKnight of Rockledge, Florida.

The bride-elect is the granddaughter of Mr. and Mrs. A. C. Wilson of Brantley, Mrs. Bertie Wilkes, Elba, and the late E. A. Wilkes. She is a graduate of Zion Chapel High School and Troy State University and is currently teaching Business Education at Hogansville High School in Hogansville, Georgia.

Shelia Hornsby To Marry Jerome White

Mr. and Mrs. Jimmie Hornsby announce the engagement of their daughter, Shelia Ann, to Jerome T. (Butch) White of Elba.

The bride-elect is the granddaughter of Mr. and Mrs. W. A. Bullard of Elba, and Mr. and Mrs. O. L. Hornsby of New Brockton. She is a graduate of Elba High School and attended Enterprise State Junior College. Miss Hornsby is presently employed with National Security Insurance Company.

Mr. White is the son of Mr. and Mrs. John and the late William C. White, Jr. His

NEW BROCKTON CLASS OF 52 HAS REUNION

The New Brockton High School graduating class of 1952 had their class reunion in late December in Enterprise.

Those attending and pictured are, FRONT ROW - Annette Stevens Williams, Dot Hornsby Tindol, Jessie Maulden Lewis, Jimmie Wil-

son Tew, Angela Pittman Watson, Virginia Adkins, Earline Ivey Holway, Nollie Tindol Wilson, BACK ROW - Joe Sam Usmukes, Quin Thomas Hickman, Betty Sawyer Bedsole, Paul Miller, Edward Jeter, Ferrell Tin-

Flower Arranging Course Offered

At ESJC

A morning and evening session of Flower Arranging begins Thursday, February 9, at Enterprise State Junior College.

The course, taught by Mrs. Sarah Cobb, will emphasize elements of floral design through informal lectures and demonstrations. Students will learn to create a variety of arrangements from permanent and dried materials.

Mrs. Cobb has twenty years of experience as owner and operator of a flower shop in Ashford, and has attended flower design schools in Dodan, Montgomery, Opelika, and Thomasville, Ga. She designs arrangements for garden clubs and schools in this area.

Morning and evening classes meet each Thursday from 9 to 11:30 a.m. and from 6:30 to 9 p.m. through March 2 in the Fine Arts Bldg. Each session is limited to 15 students, and a fee of \$10 will be charged. To register or obtain additional information, call 347-0650.

Miss Easters & Mr. Bazzel United In Holy Matrimony

Deborah Easters and Thomas Russell Bazzel, Jr., were married on Saturday, November 26, 1977, at 12 o'clock, Rev. Edward D. Henne officiated at the service in the Elba United Methodist Church. Music was provided by Mrs. Kenneth Baker, organist.

The bride was given in marriage by her father. She is the daughter of Col. (Ret.) and Mrs. Robert Douglas Easters. The groom is the son of Mrs. Thomas Russell Bazzel, Sr., of Atlanta, and the late Mr. Bazzel.

Miss Sandra Lyle of Atlanta served as Maid of Honor. Other attendants were Mrs. John Martin, Auburn; Mrs. James Sula, Atlanta; Miss Shannon Lantz, Birmingham; Miss Nancy Hoefig, Atlanta; Thomas F. Rybert III, Atlanta, served as best man. Groomsmen were Frank B. Bazzel and William F. Bazzel, Auburn, Ala.

A reception was held at the Ft. Tucker Officers Club. After a wedding trip, the couple is living in New York City.

THE WHITER THE BREAD, THE SOONER YOU'RE DEAD

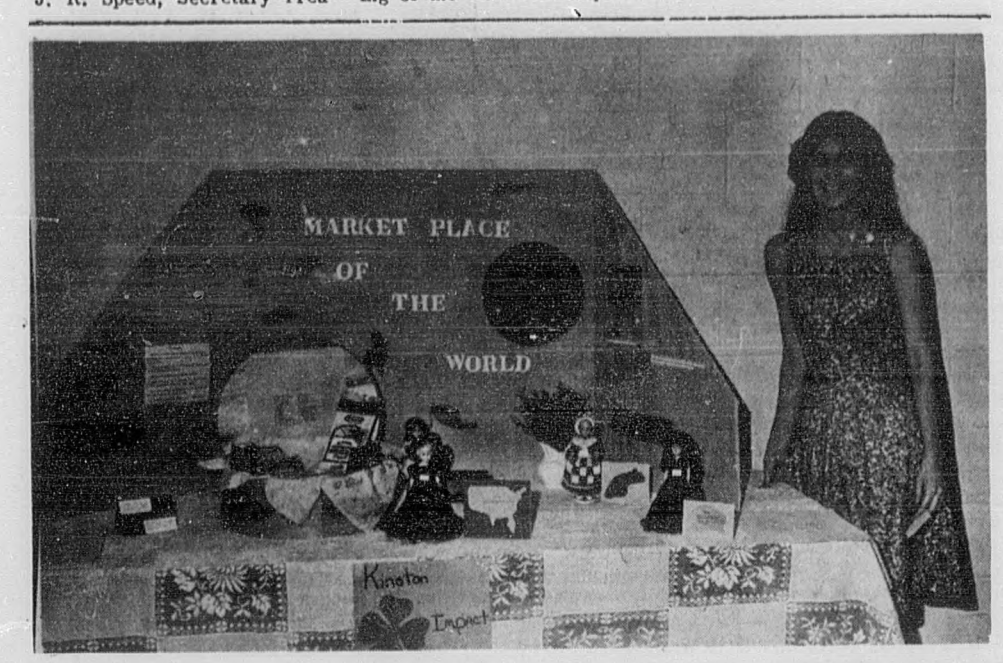

Where do you store your farm machinery? We do not have the machinery storage in Coffee County that many farmers north of us have. However, the damage done here is just as great. Cold weather and such does not harm machinery. The main problem is water and the rusting process. This occurs where you have humidity and temperatures.

For most Coffee County farmers one of the most important reasons for storing machinery in a dry place is to increase its reliability. A piece of equipment that is properly

Coffee County Cattlemen Assn. Elect New Officers

Recently elected officers of the Coffee County Cattlemen's Association are, left to right: Eugene Farris, first vice president, Elba; G.P.T. Wyatt, President, Kinston; J. R. Speed, Secretary-Treasurer, Elba; Lee Boyd, second Vice-president, New Brockton. Directors elected were Larry Parker, Benji Motes, Mack Donaldson, Charles Hayes, III, Travis Killingsworth, Dolan Averett, Lewis M. Innis, Joe McDaniel, and Mike Kelley.

Representing the Kinston Impact 4-H Club in the Senior Dairy Foods 4-H Exhibits was Pam Sheffield, daughter of Mrs. Hattie Sheffield of Kinston, Pam used as her title "Market Place of the World" and her exhibit emphasized different dairy products from different countries. In addition to her participation in this activity, Pam is an active member of the 4-H Fraternity.

A lot of Coffee County farmers will be looking for a decision on whether to plant a few more soybeans and cut down on corn or the other way around. Most Coffee County farmers realize that the big acreages of soybeans and corn are planted in the Midwest. Variations in our plantings down here have very little influence on prices. So it is important to keep up with what is happening in the Midwest which is the major producing area.

SULFUR Years ago a lot of sulfur was used in the manufacture of mixed fertilizer. In recent years some companies have cut down greatly on the amount of sulfur being used. Some fertilizers do not contain sulfur. The Auburn University Soil Testing Laboratory recommends that all fertilizers being used contain enough sulfur to apply about 10 pounds per acre each year for most crops. Some of the high analysis materials do not contain that much. The sulfur content of fertilizer should be shown on the label or tag. Check with your dealer that you are buying fertilizer from to determine if sulfur is being used. Most of the time a sulfur deficiency is more likely to occur on sandy soils. This is because sulfur tends to leach out of the root zone. We have a lot of sandy soils here in the county. So we need to supply some sulfur each year. In many instances sulfur deficiencies show up much the same as nitrogen deficiencies, that is, the yellowing of leaves and poor growth. Be sure to check with your dealer to find out if the sulfur is being used in the manufacture of fertilizer.

Machinery Storage Where do you store your farm machinery? We do not have the machinery storage in Coffee County that many farmers north of us have. However, the damage done here is just as great. Cold weather and such does not harm machinery. The main problem is water and the rusting process. This occurs where you have humidity and temperatures.

For most Coffee County farmers one of the most important reasons for storing machinery in a dry place is to increase its reliability. A piece of equipment that is properly

Program is sponsored in Coffee County by the Dairy Fresh Company. Anita will be representing Coffee County again this summer in the District 4-H Dairy Foods Exhibit.

Using Snow White and the Seven Dwarfs to illustrate the different dairy food products, Anita Mobley placed first in the Senior 4-H Dairy Foods Exhibit held recently. She is the daughter of Mr. and Mrs. C.W. Mobley of Rt. 1, Jask. Anita is the former second place winner in the State Dairy Foods Awards Program. She is a member of the Elba Action 4-H Club. The Dairy Foods Awards

former first place winner in the District Junior Breeds Exhibit and will be participating in the District eliminations this summer.

COFFEE

By Tom Casaday, County Extension Chairman

FERTILIZING FRUITS When was the last time you fertilized fruit trees and vines at your home? February is a good time to fertilize fruit trees in Coffee County. You need to get it done early so that plant roots will have time to take up the nutrients and allow good new growth in the spring. Incidentally, blackberries and strawberries need three fertilizer applications during the year - one in February, one after harvest and one in October.

Our fertilizer recommendations are as follows: Tree fruits - 1 pound 8-8-8/tree/year of age. Peaches - 2 pounds 8-8-8/tree/year of age. Pears - 3/4 pound 8-8-8/tree/year of age. Pies, grapes, blueberries - 1/2 pound 8-8-8/plant/year of age. Strawberries - 2 quarts 8-8-8/100 ft. row after harvest - in September or October or 90 days before harvest.

RECORD KEEPING Several Coffee County farmers have realized this past fall how important it is to keep records. Those applying for Small Business Administration loans and other types of loans have had to come up with records on their production and expenses the past three years or so. This is one use of records. Records are also extremely valuable for tax records.

In my opinion, by far the most important reason for farm records is to tell how you are doing in each farm enterprise. It is very difficult to know with any precision how well you are doing unless a record is kept. Quite a few Coffee County farmers get their wives to keep the records. What about determining how to keep an adequate record of your farm business? Records have always been important but certainly not with many factors entering into farming, it is more important than ever. The time you spend on records may be some of your most profitable hours.

When observing a field, soil compaction can be observed both through plant and soil conditions. The most obvious conditions are slow plant emergence, variable sized plants, off colored leaves, shallow or malformed root systems, crusting, cracks in tractor wheel marks, subsurface compact zones, standing water, excessive water erosion, increased power requirements for tillage, and the presence of partially decomposed crop residues months after being incorporated into the soil. While the high-clay type soils have a naturally compact nature, the

land judging contest found throughout Coffee County may also exhibit "cloddeness and cracking" due to mechanical compaction of the soil. Compact soils can cause a poor stand of peanuts, corn, rye or pasture grasses, while an even more drastic result of this problem can be lodging of an entire field due to shallow root systems. Fuel costs can increase enormously with the extra power demanded by tillage equipment to prepare the land properly in compacted soil conditions. Inadequate drainage is also a problem, as water is not able to percolate downward. Drowning out of young plants on large level acreages can yield disastrous results to the farmer.

Erosion of soils is often accelerated on these compacted soils, since the water is not able to seep downward. Millions of tons of soil are lost each year during heavy rains washing the soil away from the field because of decreased drainage.

Sub-soiling with a chisel plow in areas where this condition exists may help to alleviate soil compaction. No-till farming is still another answer to the problem. With less trips across the field by heavy equipment, the soil will not be compacted as much. If you feel you are having this problem, contact your local SCS representative at 894-5591 or P. O. Box 339, New Brockton, AL 36851.

COFFEE CONSERVATION By: Hughes, Faulk & Clark

LAND JUDGING CONTEST The Coffee County Land Judging Contest will be held on March 9, 1978. Area FFA teams are currently in the process of preparing for this event. The teams will be judging three different soil types and land uses to represent real life conditions for realistic recommendations. The first place team in this contest will be eligible to represent the county in the District contest. Last year's winners, Enterprise High School, will be among those teams which will participate in this contest. The Coffee County Soil and Water Conservation District is sponsoring this contest, and encourages every FFA chapter in the county to participate. If you would like any further information or assistance in preparing for the land judging contest, contact your local Soil Conservation Service representatives at 894-5591 or by writing to P.O. Box 339, New Brockton, AL 36851.

SOIL COMPACTION Deterioration of the physical condition of many of our prime agricultural soils is being caused by soil compaction. While many farmers are aware of this condition, many are still not informed of the problems created by compaction. An article in the January issue of "Crops and Soils" by L. S. Robertson and A. E. Erickson, entitled "Soil Compaction, Symptoms, Causes, Remedies," describes well the effects of compact soil on erosion, plant growth, soil moisture levels, temperatures, root growth and energy.

When observing a field, soil compaction can be observed both through plant and soil conditions. The most obvious conditions are slow plant emergence, variable sized plants, off colored leaves, shallow or malformed root systems, crusting, cracks in tractor wheel marks, subsurface compact zones, standing water, excessive water erosion, increased power requirements for tillage, and the presence of partially decomposed crop residues months after being incorporated into the soil. Last year's winners, Enterprise High School, will be among those teams which will participate in this contest. The Coffee County Soil and Water Conservation District is sponsoring this contest, and encourages every FFA chapter in the county to participate. If you would like any further information or assistance in preparing for the land judging contest, contact your local Soil Conservation Service representatives at 894-5591 or by writing to P.O. Box 339, New Brockton, AL 36851.

SOIL COMPACTION Deterioration of the physical condition of many of our prime agricultural soils is being caused by soil compaction. While many farmers are aware of this condition, many are still not informed of the problems created by compaction. An article in the January issue of "Crops and Soils" by L. S. Robertson and A. E. Erickson, entitled "Soil Compaction, Symptoms, Causes, Remedies," describes well the effects of compact soil on erosion, plant growth, soil moisture levels, temperatures, root growth and energy.

When observing a field, soil compaction can be observed both through plant and soil conditions. The most obvious conditions are slow plant emergence, variable sized plants, off colored leaves, shallow or malformed root systems, crusting, cracks in tractor wheel marks, subsurface compact zones, standing water, excessive water erosion, increased power requirements for tillage, and the presence of partially decomposed crop residues months after being incorporated into the soil. While the high-clay type soils have a naturally compact nature, the

land judging contest found throughout Coffee County may also exhibit "cloddeness and cracking" due to mechanical compaction of the soil. Compact soils can cause a poor stand of peanuts, corn, rye or pasture grasses, while an even more drastic result of this problem can be lodging of an entire field due to shallow root systems. Fuel costs can increase enormously with the extra power demanded by tillage equipment to prepare the land properly in compacted soil conditions. Inadequate drainage is also a problem, as water is not able to percolate downward. Drowning out of young plants on large level acreages can yield disastrous results to the farmer.

Erosion of soils is often accelerated on these compacted soils, since the water is not able to seep downward. Millions of tons of soil are lost each year during heavy rains washing the soil away from the field because of decreased drainage.

Sub-soiling with a chisel plow in areas where this condition exists may help to alleviate soil compaction. No-till farming is still another answer to the problem. With less trips across the field by heavy equipment, the soil will not be compacted as much. If you feel you are having this problem, contact your local SCS representative at 894-5591 or P. O. Box 339, New Brockton, AL 36851.

COFFEE CONSERVATION By: Hughes, Faulk & Clark

LAND JUDGING CONTEST The Coffee County Land Judging Contest will be held on March 9, 1978. Area FFA teams are currently in the process of preparing for this event. The teams will be judging three different soil types and land uses to represent real life conditions for realistic recommendations. The first place team in this contest will be eligible to represent the county in the District contest. Last year's winners, Enterprise High School, will be among those teams which will participate in this contest. The Coffee County Soil and Water Conservation District is sponsoring this contest, and encourages every FFA chapter in the county to participate. If you would like any further information or assistance in preparing for the land judging contest, contact your local Soil Conservation Service representatives at 894-5591 or by writing to P.O. BLACK AND GOLD REVIEW

"E" CLUB ELECTS OFFICERS

The Elba High "E" Club, which is a school organization of outstanding school athletes and cheerleaders who have earned the Varsity letter "E", held their first meeting on December 8 and elected officers. They are:

Mr. Marler - President
Perry Fuller - Vice-President
Phyllis Harrison - Secretary
Russ Wood - Treasurer
Benita Flowers - Reporter

MR. FOLEY SPEAKS TO BETA CLUB

The Beta Club held its monthly meeting in the auditorium on January 12, 1978. President Virginia Vaughan called the meeting to order. After several items of business were taken care of, the guest speaker was presented - Mr. Lamar Foley. He discussed with the Club the plans for the new lunchroom which is to be completed in August 1978. Also the possibility of a whole new school building was discussed. However, it was brought to the attention that until funds were available, the present school building would be repaired and kept up as best as possible.

Local Students Attending Presidential Classroom

Elba High School is participating in a unique government study program in Washington, D. C., by sending student representatives to attend the 1978 Presidential Classroom for Young Americans. Six students will represent Elba and Alabama as

a member of the Classroom's National Student Body. Those students participating from Elba are:

Julie Holliday, daughter of Mr. and Mrs. Henry L. Holliday, and Gypsy Morrow, daughter of Mr. and Mrs. Jake L. Morrow - JANUARY 21.

During the intensive one-week program, those pictured will join other outstanding high school students from across the nation and overseas in meeting with government leaders and Washington observers. Students attend formal seminars at which national decision makers representing a wide range of political ideologies discuss the numerous operations and responsibilities of the Federal government.

Each seminar is followed by a question and answer period in which the students are free to personally explore the speaker's topic of discussion. Chartered in 1968 as a nonprofit, educational program, the Presidential Classroom has provided more than 15,000 young people with firsthand exposure to prominent government leaders and key observers of the Washington scene.

Presidential Classroom is a private organization whose educational activities are strictly nonpartisan; its programs cannot be used to influence government legislation or policies, nor to organize opinion on behalf of any governmental or private objective. For further information on participation in the 1978 Classroom, write directly to Presidential Classroom, P. O. Box 19084, Washington, D. C. 20036.

Seniors Of The Week

SHARON COON, daughter of daughter of Mr. and Mrs. W.K. Coon, and Linda Coon, daughter of Mr. and Mrs. W.K. Coon, were named Seniors of the Week for the first semester.

Off-Season Conditioning Program Begins

Between 40 and 50 Elba High School boys are participating in an off-season conditioning program for football players. The purpose of this program is to improve strength, stamina, speed, quickness and overall physical condition.

On Mondays, Wednesdays and Fridays these hardworking youth emphasize on weight training, military press, power lifts and curls; jump rope; push-ups and sit-ups; and exercising.

On Tuesdays and Thursdays they condition outside with exercise, sprints, agility, and specialty, and inside with exercise, wrestling and agility. The coordinator of the program, Coach Mac Wood, stresses that everyone involved is working very hard.
